

# [Organizer]

## Abstract

A bathroom organizational assembly is presented for organizing the bathroom vanity area. The bathroom assembly creates an organized method of organizing bathroom toiletries such as toothbrushes, combs, lotions, antibacterial soaps, facial tissue, barrettes, contact lens cases, and practically any other toiletry item. The bathroom organizational assembly consolidates and simplifies daily necessities with an enjoyable theme for the appropriate age group to encourage their usage. Storage and dispensing of items stored in the present invention simulates actions in the theme, to create functional decoration.
